(54) INFORMATION TERMINAL EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an information terminal equipment in which the comparison between pages is easily performed and the edition for every page becomes easy.

SOLUTION: The liquid crystal boards 1 to 3 of a portable type information terminal 14 have at least one of means displaying the information file composed of at least one of character information, graphic information and image information and means inputting and editing the information file. The boards are provided with communication means transmitting and receiving the information file and control information and means for cooperating with other information terminal equipments by using this communication terminal. At least one information file is displayed by dividing the file between other cooperative information terminal equipments.
